Course Description

This workshop is a full day presentation (6 hours content) that incorporates numerous breakout sessions and hands-on strategies to implement the paradigm changes that are required to radically transform nursing education to better prepare students for clinical practice based on the work of Patricia Benner and the co-authors in *Educating Nurses: A Call for Radical Transformation*.

These paradigm changes include the need to contextualize theory content to the bedside so students can see why it is relevant, greater integration of classroom and clinical education, and emphasis of clinical reasoning throughout the curriculum. Practical tools that the presenter has created and successfully used in his program to make transformation possible and teach students to think like a nurse using the skill of clinical reasoning will be provided to empower educators to implement change where it may be needed in their program.

But lasting change requires more than tools. New ways of THINKING about nursing education also need to be embraced including a dual emphasis of preparing students for NCLEX success as well as preparing them for real-world practice. A vision of transforming the nursing profession is communicated that includes discussing the cancer of incivility that remains all too common in nursing and nursing education. Practical strategies to directly and respectfully address incivility and bullying in both the academic and clinical contexts are discussed.

Objectives

Following this workshop the learner will be able to:

TRANSFORM THE CLASSROOM

- 1) Identify active learning strategies to engage adult learners.
- 2) Create a case study scenario using the four elements of storytelling.
- 3) Construct a clinical reasoning case study that utilizes the key components of clinical reasoning.
- 4) Identify student and faculty barriers to active learning and how to overcome them

Learning Methods and Aids

Small group discussion, personal reflection, create/develop case study, share current educational best practice to develop clinical reasoning, and share/instruct in the use of tools that develop clinical reasoning.

About The Speaker

Keith Rischer, MA, RN, CEN, CCRN is an author, blogger, nurse educator, and staff nurse who has practiced for thirty-one years in a wide variety of clinical settings. He currently works in critical care and ED. Defined by his passion for nursing and excellence in education, he is a recognized authority on clinical reasoning and its relevance to nursing practice.
