HUMAN SEXUAL BIOLOGY

BIO 120 Human Sexual Biology 3.0 UNITS

This non-lab science course is designed for liberal arts and other non-science majors. It gives students the opportunity to discover and understand the major biological aspects of human sexuality. It focuses on the anatomical and physiological study of the reproductive system, conception process, pregnancy period, prenatal development and delivery stages, sexual maturation, gender distinctiveness, and the infectious maladies and specific medical conditions associated with human sexuality. Video simulations in selected topic are incorporated to reinforce scientific exploration and formulation.
