Graduate Degree Requirements (Master of Science in Psychology or Master of Arts in Psychology Option)

Students will have the option of either obtaining a MA or MS depending on their course options. Both options entail 36 credits. The MA option entails completing a 3-credit capstone project as part of their electives. The capstone course will signify completion of the MA requirement. For the MS, students will complete a 6-credit thesis sequence that culminates with a successful defense of a thesis paper/project. Regardless of the number of courses taken, students can only earn a MA or MS degree, not both.

Notes:

- Psychology majors are required to complete a Lab Science sequence (General Biology I and II or Human Anatomy and Physiology I and II)
- If you take PS-235 Life Span Development, you may not take PS-230 Childhood and Adolescence or PS-240 Adulthood and Aging.
- Students majoring in Psychology may choose (but are not required) to pursue a concentration in clinical psychology, forensic psychology, or industrial organizational psychology. Concentrations entail 15 credits of coursework that allow students to focus on an area that they might be considering for graduate study and/or a future career.
- Students are required to earn a minimum grade of C in PS-200 and PS-210
- Accelerated graduate program available for students earning minimum 3.0 GPA. Students can complete up to 12 graduate credits while completing their undergraduate degree in place of free elective courses.
