

## **Advisory Board**

The advisory board in the Construction Management program aims to align the curriculum with industry standards, provide expert guidance, and create networking opportunities. It assists in resource development, strengthens community engagement, supports continuous improvement, and acts as an advocate for the institution. Additionally, it helps the program adapt to educational trends, improve course offerings, and enhance overall effectiveness and reputation.

The Construction Management advisory board is composed of professionals from following esteemed companies within the construction industry.
