

INTRODUCTION TO

BEEKEEPING SCIENCE

ENV-107-7WK2 (3 CREDITS)

**START
DATE**

3/19

TIME

**M: 6p-8:15p
Sa: 10a-1p**

Dive into the scientific study of bees, covering their diverse species, life cycles, and essential roles in pollination and biodiversity.

Through a combination of interactive lectures, hands-on demonstrations, and field visits to apiaries, students will gain practical knowledge in fundamental beekeeping techniques, hive assembly, disease prevention, and ethical practices
