Prerequisites: NSG 220

Instructor:

COURSE DESCRIPTION:

This course consists of an analysis of selected current health trends and issues and their impact on the practice of nursing. Content will focus on exploration of contemporary ethical dilemmas, economic and social issues, and concepts related to nursing leadership role transition, and safety and quality concepts. Emphasis in clinical will be placed on functioning as a part of the interdisciplinary team, while managing patient care for multiple patients utilizing principles of leadership and management. The clinical component of the course is completed in the simulation lab as well as the community/school setting.

COURSE OBJECTIVES:

1. Collaborate with health care team to provide patient centered care to promote health in the community.
2. Compare interventions to bridge gaps between local practices and evidence-based best practices.
3. Analyze measures for achieving continued personal and professional development.
4. Evaluate effectiveness of strategies that create a culture of safety.
5. Value the nurses' involvement in design, selection, implementation and evaluation of information technologies to support patient care.
6. Apply leadership principles and critical thinking skills in the management of patient care.
7. Evaluate practice dilemmas using ethical and legal principles.
