

# Networking Technology Workshop at HCCC

LEARN HOW NETWORKS IMPACT DAILY LIFE AND BASIC  
IMPLEMENTATION OF NETWORK SOLUTIONS.

- Learn how computer networks have broken down boundaries for global communications and the network components used to do it.
- Explore network device configurations and how security is fundamental part of computer networking in a home network connected to the internet or in an enterprise environment.

This series of workshops is designed to address, discuss and demonstrate how we use and configure computer networks for home and business. Topics covered will include how networks connect us, network components and devices, types of networks, network trends, discussion of network security threats and mitigations techniques.

**The Series of Workshops will be conducted on:**

1. Tuesday, June 14 from 2:00 p.m. to 4:00 p.m.
2. Tuesday, June 21 from 2:00 p.m. to 4:00 p.m.
